SECRET 25X1 Between 21 August and 16 September, the Schweinrich area at the Wittstock troop training grounds was still occupied. No troops left the area during the period mentioned. 25X1 8. On 14 September, the Schweinrich cantonment at the Wittstock troop training grounds was heavily occupied. Officers and FM and many Soviet women and children were seen in the camp. Several trucks with officers, women, children and billeting equipment left the camp toward Schweinrich. Marksmanship with small arms was practiced at the firing ranges. Two 57-mm AT guns were observed being cleaned. 9. It was learned that the units from Camp Schweinrich at the Wittstock training grounds had not yet left for exercises on 13 September. The units of the Perleberg post were reportedly to return in early October. The hospital was expected to return to Perleberg on or after 19 September. During the preceding years, the hospital returned to the post about 2 weeks earlier than the units. Beginning in early September, almost all dependents of Soviet officers returned to Ferleberg from the Wittstock training grounds. 10. On 31 August, several railroad cars carrying 12 to 14 x 120-mm mortars, 14 to 16 x 122-mm field howitzers and a few trucks were seen on the spur track of the Fliegerhorst Kaserne (5342)in Perleberg. The equipment allegedly belonged to units from the installation which were to leave for a short-term loading practice in the vicinity of the post. 8 25X1 Comment. For information on the return of light AAA units of the 1st Mech Div from Altengrabow, 25X1 25X1 Comment. the vehicles 25X1 may have belonged to units of the 3d Gds AAA Div which returned to their post. 25X1 Comment. It is possible that this engineer shipment went to the Guesen area northeast of Eurg, to which elements of the unidentified engineer regiment of the GSFG from Sperenberg transferred in 2 shipments on 11 September. 25X1 It is undetermined, whether the movements were made in connection with the scheduled fall maneuvers in the Burg-Genthin area or with engineer exercises on the Elbe River in the Guesen area. For 25X1 indications of the first mentioned exercises 25X1 . The motor vehicle belong to thr 36th FonBridge Regt of the GSFG. 25X1

carried light AAA units of the 20th Gds Mech Div from Jena which

Comment. The information indicates that the 136th Gds Hv Tank SP Regt of the Third Shock Army was stationed at Letzling

probably returned to their post from Altengrabow. Units of this division had been observed at the Altengrabow training grounds

SECRET 25X1 25X1 Comment. The movements are believed to have been connected with the beginning of the school for Soviet children in Magdeburg. 25X1 Comment. Prior to mid-September, the bulk of the 18th Mech Div was stationed at the Wittstock training grounds as previously. 25X1 According to paragraph 9, units of the division are expected to return to their winter quarters in early October. For information on the return of Soviet dependents, see Field Comment 6. 25X1 Comment. According to weapons observed, units of the 1054th How Arty Regt and the 592d Mort Regt of the 18th Mech Div were entrained. The presence of the troops at the post at that time is unusual but appears possible in view of the following: Observations at posts of the 10th Gds Tank Div and the 12th Gds Tank Div tended to indicate that, since late June, the mortar regiments in the zone were being reequipped. Since field howitzers which arrived from the USSR were observed with the abovementioned divisions, it was assumed that the medium units of the mortar regiments were reorganized into field howitzer battalions and had to turn in their former equipment. The observation of these two types of weapons in one shipment may indicate that this reequipment also involved the mortar regiment of the 18th Mech Div which possibly returned to the post in connection with this measure. 25X1
